

VinBulk™

## Trans Ocean

more than flexible

  
**TransOcean**  
bulk logistics solutions

# More than a logistics provider

Since 1984, our motivation and ability to excel in providing a world class service is driven by our capacity to supply the most advanced Flexitank solution, together with full door to door logistics and proven technical knowledge.

VinBulk™

## Why VinBulk™?

The VinBulk™ has revolutionised bulk liquid shipping, it is a unique Flexitank system exclusively manufactured by the Trans Ocean Group.

A VinBulk™ will transform a 20 foot container into a bulk liquid transportation system.

VinBulk™ incorporates the latest design in barrier technology - providing a 'Taint Compound' protection.

Shipping your liquid product in bulk delivers proven environmental & economical advantages. The product to RhinoBulk™ packaging ratio can reach 400:1.

Available in capacities of 10,000 (2641 US Gallons) to \*24,000 litres (6340 US Gallons), this can represent more than double the capacity of pre-packaged cargo.

(\*The maximum product allowable in the VinBulk™ shall be the greater of: 24,000kg if the specific gravity >1, or 24,000 litres if the specific gravity <1)

**To find out how we can assist you further with your shipment requirements simply contact us in one of our regional offices or via our website.**
