## STORAGE SOLUTIONS

Utilising Trans Ocean's flexitank products within a stationary container, we can provide a secure and adaptable storage solution.

Designed specifically to ensure your liquid product is stored safely and in optimum condition until discharge, our temporary and permanent storage solutions can assist with stock management and facilitate just-in-time management systems.

## FEATURES AND PRODUCT DETAILS:

- Maximise your secure on-site storage and reduce the need for costly off-site facilities
- On-site storage allows for regular monitoring of product quality and safety
- Can be used as temporary storage solution at load or discharge points to assist in just-in-time delivery systems, or peak demand requirements
- Permanent storage solutions of various capacities can also be provided on a project basis
- Lockable storage for security and peace of mind
- Sampling the product is made easy with the addition of a sampling cap
- Can be used with RhinoShield and Heater Pads if required

## WHICH INDUSTRIES CAN BE SERVED BY STORAGE SOLUTIONS?

- Animal and vegetable fats and oils
- Beverages
- Commodity chemicals
- Food additives
- Mineral oils and fuels
- Pharmaceuticals
- Specialty chemicals

## STORAGE SOLUTIONS SPECIFICATIONS

Minimum volume	10,000 litres (2,641 US gallons)
Maximum volume	24,000 litres (6,340 US gallons) if the specific gravity <1
Load capacity tolerance	± 500 litres (against rated capacity)
Usage	Disposable (one trip use)
RhinoBulk / flexitank material	Linear low density Polyethylene Single layer.
Low temperature of product at loading	0°C
High temperature of product at loading	+60°C
Maximum load flow rate	1000 litres per minute
